

DATA SECURITY SOLUTIONS

Securing Your Data Throughout its Lifecycle

OVERVIEW

Data is an integral part of any business. Preventing data loss and controlling the flow of data in and out of your organization is essential. It is vital to consider the management and protection of the entire data lifecycle, which includes data creation, data at rest, data in motion, data in use and data destruction. Our dedicated experts help you define your data security holes and find the right combination of services and technologies to remediate those vulnerabilities.

Technology Consulting Services:

We help you assess your current infrastructure, plan for a technology purchase, determine your readiness for implementation and much more with our consulting offerings.

- Technology Assessment
- Resident Program
- Training Services

Our Team

Data Security Projects
in 2014

Dedicated Consultants

TECHNOLOGIES SUPPORTED:

- Data Loss Prevention (DLP)
- Database Encryption
- Database Protection
- Public Key Infrastructure (PKI)
- Database Activity Monitoring (DAM)

1. Technology Assessment

Goal

Validate technology decisions and help discover the best fit for the organization.

Overview

Workshop between a technology expert and key security stakeholders to understand technology needs and requirements. Whether to confirm the validity of a single-point product or differentiate between competing solutions, we evaluate each technology in a thorough, methodical and unbiased manner.

Types of Assessments Offered

DLP

PKI

APPROACH

- › Planning
- › Discovery
- › Analysis, Scoring and Validation
- › Recommendations
- › Plan for Next Steps

TIME FRAME

- › Depends on technical requirements

DELIVERABLES

- › Report detailing requirements, test procedures and a scorecard comparing each product evaluated against the requirements set.

2. Resident Program

Goal

Access to a deep bench of talent that can handle the day-to-day operation of the technologies and processes required to have an effective security program.

Overview

With today's staffing challenges in identifying, recruiting, training and retaining required cyber security resources, we fill in the gaps to take on current and future projects to move your overall security program forward.

Types of Assessments Offered

DLP

Database Activity Monitoring (DAM)

APPROACH

- › Planning
- › Goal Alignment
- › Delivery

TIME FRAME

- › Variable

DELIVERABLES

- › Dedicated support for the day-to-day operations required to have an effective security program.

3. Training Services

We offer training services that address the technical and human elements of your organization to help ensure you're operating securely. Our range of course topics help you meet compliance, maximize data security, manage vendor technologies and incorporate industry best practices. With instructor-led, on-site, remote live and computer-based training options, it's an easy and cost effective way to equip your staff with just-in-time learning.

TYPES OF TRAINING SERVICE OFFERED:

- › Classroom
- › Remote Live
- › On-site
