

Cyber Threat Intelligence Consulting Services

Transform Threat Data into Actionable Intelligence

Challenge

The increasing volume and speed of dynamic and emerging threats has left organizations scrambling to effectively incorporate cyber threat intelligence into their security operations to improve detection and response. Faced with an overwhelming threatscape, in addition to vast numbers of new threat intelligence products and services to consider, the difficulty in getting the threat intelligence tailored specifically to your company and mission is daunting. In many cases, in house expertise cannot create or mature the collection, analysis and dissemination of threat intelligence, build a cyber threat intelligence program or define the cyber threat landscape. Overlooking or neglecting these cyber security program elements could result in costly breaches and decreased overall security effectiveness.

Solution

The solution is having a partner with industry expertise to help you plan, build and run your cyber threat intelligence function. Optiv's Cyber Threat Intelligence Consulting Services engage with your key stakeholders to create or mature the collection, analysis and dissemination of threat intelligence related to relevant threat actors and probable threat scenarios to your organization. The service enables your organization to develop or mature its threat intelligence program, enhance your security operations and help you define an organization-specific cyber threat landscape tailored to your unique business environment. The service assesses, develops and matures information collected by native and peripheral sources, as defined by customized collection processes, allowing you to produce actionable products for dissemination to senior leadership and operations teams.

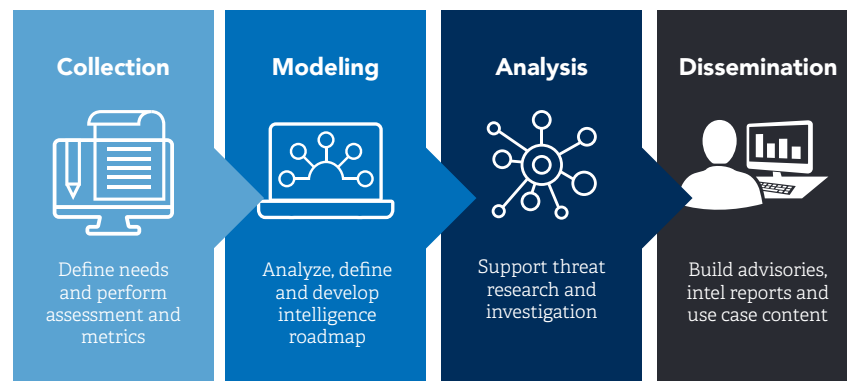

Benefits of Working with Optiv

Become Proactive: Change your security model from reactive to proactive and address any outstanding problems that are bogging you down.

Define a Strategy: Define better security investment strategies that help you manage business risk.

Optimize Defenses: Discover new or revive existing security technologies and defenses to augment the blocking of dynamic and emerging threats.

Improve Decisions: Map a path for transition to enable turning threat environment data into accurate, timely and actionable decisions.

Optiv is the largest holistic pure-play cyber security solutions provider in North America. The company's diverse and talented employees are committed to helping businesses, governments and educational institutions plan, build and run successful security programs through the right combination of products, services and solutions related to security program strategy, enterprise risk and consulting, threat and vulnerability management, enterprise incident management, security architecture and implementation, training, identity and access management, and managed security. Created in 2015 as a result of the Accuvant and FishNet Security merger, Optiv is a Blackstone (NYSE: BX) portfolio company that has served more than 12,000 clients of various sizes across multiple industries, offers an extensive geographic footprint, and has premium partnerships with more than 300 of the leading security product manufacturers.
