

HITRUST CSF Assessment

Satisfy Healthcare Compliance Requirements Through a Single Assessment

Challenge

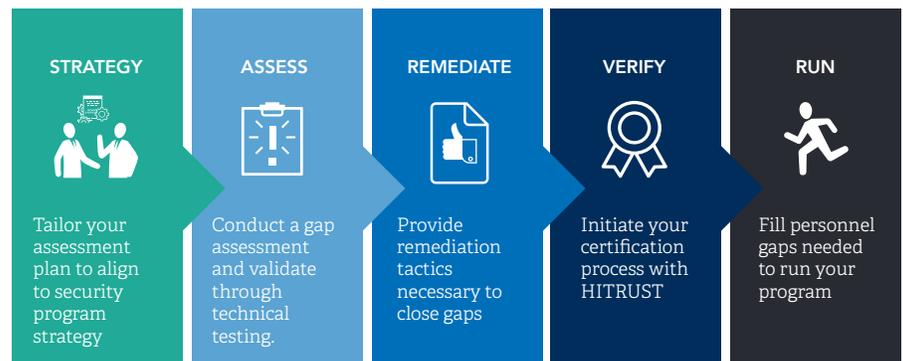

Organizations entrusted with protecting Personal Health Information (PHI) are cracking down on security by mandating comprehensive security practices. Large healthcare breaches are frequently in the spotlight. Historically, compliance has suffered from inconsistency across the healthcare spectrum. As a result, several major insurance companies require that their business associates become HITRUST CSF certified. With compliance deadlines approaching, organizations face short timelines and an assessment cycle that can take months to complete.

HITRUST

The HITRUST CSF harmonizes standards and regulations and takes a risk based approach specifically for the healthcare environment. As a collaboration between healthcare and information security professionals, the CSF Framework assists organizations to comply with healthcare (HIPAA, HITECH) third party (PCI, COBIT), and government (NIST, ISO) regulations and standards, as well as state laws into a single assessment.

Solution

Optiv is the largest pure-play cyber security solutions provider in North America. As a HITRUST CSF Assessor, we assess your compliance against security controls requirements. We partner with your organization to operate with cost efficiency by aligning assessment activity to business priorities as well as compliance requirements. Our seasoned healthcare security experts, document corrective action plans to remediate gaps. We can assist your organization through remediation, strategic planning and staff to meet program goals and requirements.
