

# SECURITY INTELLIGENCE SOLUTIONS

Navigating the Complexities of Security Intelligence

## OVERVIEW

In today's world, breaches will succeed and the adversary is highly skilled in avoiding detection. The question is not "if," but "when" an incident will occur. As IT complexity increases, skilled security analysts become harder to attract, keep and train. To address these advancing issues, we provide a wide range of Security Intelligence services and solutions to keep you protected, whether you're concerned about meeting compliance requirements, internal and external threat management, or early breach detection.

### Technology Consulting Services:

We help you assess your current infrastructure, plan for a technology purchase, determine your readiness for implementation and much more with our consulting offerings.

- Technology Summit
- Technology Assessment
- Managed Security Services

### Our Team

Consultants Dedicated to Security Intelligence

Security Intelligence Technology Certifications

Security Intelligence Projects in 2014

### TECHNOLOGIES SUPPORTED:

- SIEM and Logging
- Search and Analytics
- Threat Intelligence
- Behavioral Analytics
- Network Security Monitoring

## 1. Technology Summit

### Goal

Narrow the technology buying decision and provide a base of knowledge and sample processes for all stakeholders.

### Overview

On-site workshop between our technology experts and your key security stakeholders to create an understanding of the technology and a unified perspective across security, compliance, IT and audit leadership.

### Types of Assessments Offered

SIEM

### APPROACH

- › Planning
- › Goal Alignment
- › Deep Dive
- › Technology Overview
- › Recommendations
- › Plan for Next Steps

### TIME FRAME

- › Two day on-site workshop

### DELIVERABLES

- › High-level plan that describes essential technology requirements, system architecture, roadmap and recommendations.

## 2. Technology Assessment

### Goal

Validate technology decisions and help discover the best fit for the organization.

### Overview

Workshop between a technology expert and key security stakeholders to understand technology needs and requirements. Whether to confirm the validity of a single-point product or differentiate between competing solutions, we evaluate each technology in a thorough, methodical and unbiased manner.

### Types of Assessments Offered

SIEM and Logging  
Search and Analytics

### APPROACH

- › Planning
- › Discovery
- › Analysis, Scoring and Validation
- › Recommendations
- › Plan for Next Steps

### TIME FRAME

- › Depends on technical requirements

### DELIVERABLES

- › Report detailing requirements, test procedures and a scorecard comparing each product evaluated against the requirements set.

### 3. Managed Security Services

Our Managed Security Services are designed to serve as a remote extension of your security staff. Our experienced security professionals provide the essential knowledge and security procedures your organization needs to effectively monitor the health and security of your environment and quickly identify, analyze and respond to potential security threats.
