

MAXIMIZE YOUR TECHNOLOGY INVESTMENTS

Remediate Security Control Gaps

A large portion of an organization's budget goes to procuring the technologies needed to protect assets and meet compliance requirements. To best meet these goals, implemented technologies need to be utilized to their full capacity. Often products are deployed to replace old and end of life technologies, or to meet compliance requirements with very little thought or effort given to maximizing the value of these newer, more sophisticated products. How do you know if the technologies you put in place are working efficiently and protecting your systems as you hoped? Even more pressing – are you current on the latest updates, configurations and processes that keep your technology relevant?

Optiv's Optimization services help you best utilize your security technologies and features as well as the networks and systems they were acquired to protect. We can help reduce the cost of investment as you effectively adopt, manage and scale technologies and applications in today's highly evolved threat landscape. We provide the technical leadership, professional services expertise, tools and best practices to help you intelligently run your security infrastructure for optimal performance.

Optiv provides Optimization services in the following technology areas:			
<p>Application and Data Solutions</p> <ul style="list-style-type: none"> • Application Performance • Compliance • DLP • Database Protection • Web Application Firewalls • Web and Email Security • PKI 	<p>Endpoint Solutions</p> <ul style="list-style-type: none"> • Advanced Malware • Application Control • Encryption • Endpoint Suites • Host IPS • Asset Management • Vulnerability Management 	<p>Network and Mobility Solutions</p> <ul style="list-style-type: none"> • Firewall • Network IPS • Network Malware • DNS/DHCP/IPAM • MDM/MAM • Wireless • Network Access Control 	<p>Security Intelligence</p> <ul style="list-style-type: none"> • SIEM and Logging • Search and Analytics • Threat Intelligence • Behavioral Analytics • Network Security Monitoring

How Do We Do It?

Optiv's Optimization services provide the knowledge and expertise to address your security needs, compliance requirements and business objectives. Our services includes five phases:

- **PLANNING:**
 Optiv consultants conduct a pre-project call to learn about business goals and requirements.
- **REVIEW AND ANALYSIS:**
 We review existing documentation, current infrastructure and security requirements to determine the course of action.
- **OPTIMIZATION AND REMEDIATION:**
 Optimized configurations and settings are put in place based on vendor, industry and Optiv best practices. This could include addition of new policies, rules and configurations.
- **DOCUMENTATION:**
 Summary of gathered information, identified gaps, associated recommendations, changes made, applied methodologies, high-level findings and final configurations.
- **NEXT STEPS:**
 Consider routine Health Checks and Optimizations to keep your systems operating at maximum efficiency and relevancy.

Benefits of Optiv's Optimization Service

Identify and Remediate Security Gaps:

Know and fix your weaknesses prior to an incident.

Increase the Effectiveness of Your Team:

Project documentation and knowledge transfer help create product authorities within your own team.

Leverage Leading Practices:

Gain the upper hand from industry best practices to increase your security posture.

Ability to Focus on Other Projects:

Free up your staff from trying to learn the ins and outs of specific products to focus on larger initiatives.
