Optiv's Governance Risk and Compliance Services

Get the Most Out of Your RSA Archer Investment

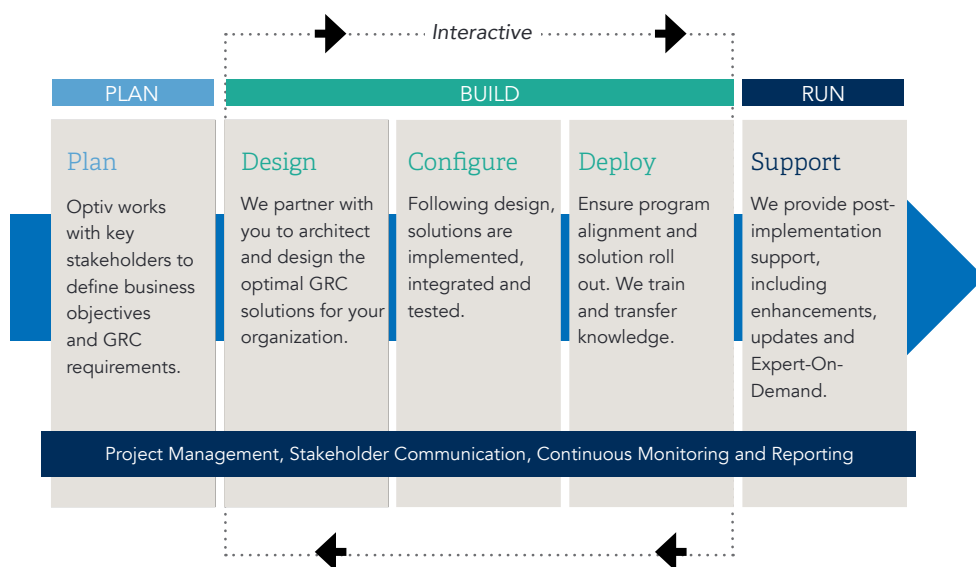

Challenge

Too often, board-level leadership lacks visibility into finding and remediating the risks facing its organization. When companies need a solution that provides an enterprise view of risk, they most often look to a tool for assistance. Working with hundreds of clients, Optiv experts can attest that simply purchasing a governance, risk and compliance (GRC) tool without a program strategy will drive minimal business value. A tailored framework and strategic roadmap that includes people, process and technology is vital to the success of a GRC program.

Solution

Optiv assists your organization holistically, from establishing a governance framework to building and maturing your respective GRC programs. The decision to deploy a GRC technology allows you to automate and optimize key business functionality to effectively manage critical assets, policies, compliance, threats and vulnerabilities across the enterprise. Remember, a technology solution is not enough. Optiv helps your organization build a GRC strategy. We align purchasing and implementation decisions to your larger GRC program and business goals. Together we can help your organization transform risk and compliance efforts into a competitive advantage.
