EXPERT PLANNING FOR YOUR SECURITY DEPLOYMENT

Align Technology Implementation to Your Business Needs

A large part of your budget is spent acquiring the technologies necessary to protect your assets, but often these products don't perform as expected, or end up as shelf-ware. The first step to realizing the true benefit of your investment is designing the right implementation. Optiv's Design services help ensure you have the right plan in place to implement your technology purchases with maximum efficiency. With your current infrastructure and business needs in mind, our team of product experts utilize industry and manufacturer best practices to provide a custom design suited to your environment.

Our team delivery model provides an end-to-end approach maximizing expertise on your projects, while keeping budgets in check. Optiv technology consultants average more than 10 years of industry experience and hold industry accreditations such as the Certified Information Security Manager (CISM), the Certified Information Systems Security Professional (CISSP) as well as specific product certifications. Whether you're implementing a new technology, migrating from an old platform, or an existing technology is underperforming, Optiv can make sure you're getting the most out of your investment.

Optiv Provides Design Services in the Following Technology Areas:

Application and Data Solutions	Endpoint Solutions	Network and Mobility Solutions	Situational Awareness (SIEM)
• Application Performance • Compliance • DLP • Database Protection • Web Application Firewalls • Web and Email Security	• Advanced Malware • Application Control • Encryption • Endpoint Suites • Host IPS	• Firewall • Network • IPS/IDS Network • MDM/MAM • Wireless	• SIEM Solutions

How Do We Do It?

ALIGNMENT TO BUSINESS AND REGULATORY NEEDS: Optiv assigns a team of consultants who are experts in your products. By conducting interviews with key stakeholders, our experts take the time to understand your technical goals and business drivers and align the project to your specific needs.

CUSTOM DESIGN CREATION AND REVIEW: Once our consultants understand your goals and needs, we use industry and Optiv best practices to develop an appropriate infrastructure design for your environment.

FUTURE ROADMAP: After the design is finalized, Optiv provides you with a roadmap to meet anticipated future requirements to help keep your infrastructure efficient.

PLAN FOR NEXT STEPS: If you don't have the staff in-house or would like them to focus on other tasks, our team can implement your technology and make sure it's done right the first time. We also offer periodic Health Checks with the option of Optimization, to keep your technology running at peak performance.

Benefits of Optiv's Design Service

Align Technology Investments with Business Needs:
Ensure that your purchases meet your needs today and in the future.

Ability to Focus on Other Projects:
Your staff can focus on bigger initiatives and don't need to become experts on specific products.

Leverage Leading Practices from the Beginning:
Gain the upper-hand with industry best practices from day one.

Get it Right the First Time:
Reduce the risks from improperly designed technology. Make sure that products are working as you expect.

Optiv provides Design services for solutions from the following partners:
