

PROACTIVELY CONFIRM YOUR SECURITY CONTROLS

Assess and Verify Your Systems

Keeping technology current and running at optimal levels can be a challenge when faced with issues such as limited staffing, organizational expansion and architectural changes. Optiv's Health Check service is a high-level technical review that identifies vulnerabilities and configurations which may compromise confidentiality, integrity or availability of information. We document our findings with a list of vulnerabilities requiring remediation, including recommendations to address issues and better integrate and leverage your technology. Even if your systems installed years ago are working well today, a Health Check assessment helps make sure you are not at risk of potential security threats, that issues are identified before problems occur and that infrastructure documentation is current.

Proactive Health Checks help ensure your systems stay current and meet regulatory standards. Monthly, quarterly and annual programs are available. For an additional fee, consider Optiv's Optimization service to perform any tasks or remediation that surfaces during your Health Check.

Optiv Provides Health Check Services in the Following Technology Areas:

 Application and Data Solutions	 Endpoint Solutions	 Network and Mobility Solutions	 Situational Awareness (SIEM)
<ul style="list-style-type: none">• Application Performance• Compliance• DLP• Database Protection• Web Application Firewalls• Web and Email Security	<ul style="list-style-type: none">• Advanced Malware• Application Control• Encryption• Endpoint Suites• Host IPS	<ul style="list-style-type: none">• Firewall• Network• IPS/IDS Network• MDM/MAM• Wireless	<ul style="list-style-type: none">• SIEM Solutions

How Do We Do It?

PLANNING:

Optiv consultants conduct a pre-project call to learn about the business goals and requirements.

REVIEW:

We review existing documentation and determine the organization's current infrastructure and security requirements.

DOCUMENTATION:

We create thorough documentation with a summary of the current infrastructure, issues requiring remediation, recommendations to address the issues and ways the organization can better integrate and leverage deployed technologies.

PLAN FOR NEXT STEPS:

With our Optimization service, we configure and remediate any issues found according to industry, vendor and Optiv best practices.

Benefits of Optiv's Health Check Service

Identify Security Gaps:

Know your weaknesses so you can remediate them prior to an incident.

Increase the Effectiveness of Your Team:

Project documentation and knowledge transfer help create product authorities within your own team.

Leverage Leading Practices:

Gain the upper-hand with industry best practices to increase your security posture.

Ability to Focus on Other Projects:

Your staff can focus on bigger initiatives and don't need to be experts on specific products.

Optiv provides Health Check and Optimization services for solutions from the following partners:

The Optiv Advantage:

Optiv can help businesses in every industry connect information security policies, procedures and practices with business goals. Our security leadership experts, backed by our team of consultants, can provide the experience you need to take your program to the next level.
