

Managed Endpoint Protection Platform

Maximize Your Platform Value With Expert Guidance

Challenge

Endpoint security is a foundational part of any security program, but it isn't always easy to manage. Investing in an endpoint protection platform (EPP) and keeping it in a state of continual readiness can be a challenge. You need experts that are trained on product changes and releases, as well as integration with a threat analysis function that can investigate incidents. Another challenge is keeping this operation running on a 24x7x365 basis to minimize risk exposure. When problems happen, and they will, you need fast solutions that won't disrupt normal business and security operations.

Solution

Optiv's managed endpoint protection platform service provides certified experts to deliver continuous endpoint platform management and monitoring. By quickly implementing vendor changes and releases and managing platform problems and incidents as they occur, we keep your technology running to minimize risk. Our on-call staff is trained to provide a set of operational deliverables, investigate security alerts and perform threat analysis for high severity incidents. We also deliver quick remediation when any break-fix issues occur on a 24x7x365 basis.

Benefits of Working with Optiv

Regain Confidence: Our certified staff hold up-to-date certifications.

Maximize Return on Investment: We increase the utility of your platform by making full use of its features on your behalf.

Save Time: Quickly solve issues with our expert guidance, instead of the normally time consuming process of digging through pages of product information.

Reduce Risk: When in house resources are unavailable, Optiv provides resources to help ensure alerts are quickly investigated and escalated.

Service Components

Optiv is a market-leading provider of end-to-end cyber security solutions. We help clients plan, build and run successful cyber security programs that achieve business objectives through our depth and breadth of cyber security offerings, extensive capabilities and proven expertise in cyber security strategy, managed security services, incident response, risk and compliance, security consulting, training and support, integration and architecture services, and security technology. Optiv maintains premium partnerships with more than 350 of the leading security technology manufacturers.
